1. Description of Proposed Improvement: \_\_\_\_\_

2. Gross Impervious Area of the Proposed Improvement in Square Feet: \_\_\_\_\_

3. Are You Removing or Demolishing Existing Impervious Area? \_\_\_\_\_ Yes \_\_\_\_\_ No

A. If Yes, What is the Size in Square Feet of the Removed/Demolished Area? \_\_\_\_\_

4. Net Impervious Square Feet Being Added (Line #2 minus Line #3A): \_\_\_\_\_

The undersigned hereby represents that, to the best of his/her knowledge and belief, all information listed above and on the Project Site and Proposed Improvement plan herewith submitted is true, correct, and complete. No part of the proposed construction is located within an existing easement or wetland area.

*To Be Completed by the Borough, SWM Exemption Not to Exceed a Cumulative Total of 1000 Square Feet*

1. Impervious Square Feet Remaining Balance Prior to this Project (Calculated From 4/7/2014 to Current):

\_\_\_\_\_

2. Total Impervious Square Feet Remaining After Completion of this Project: \_\_\_\_\_

**Impervious Surface** - A surface that has been compacted or covered with a layer of material so that it prevents or is resistant to infiltration of water, including but not limited to: structures such as roofs, buildings, storage sheds; other solid, paved, or concrete areas such as streets, driveways, sidewalks, parking lots, patios, impervious areas around swimming pools, tennis or other paved courts; or athletic playfields comprised of synthetic turf materials. For the purposes of determining compliance with this Ordinance, compacted soils or stone surfaces used for vehicle parking and movement shall be considered impervious. Uncompacted gravel areas with no vehicular traffic, such as gardens, walkways, or patios areas, shall be considered pervious per review by the Borough Engineer. Surfaces that were designed to allow infiltration (i.e., pavers and areas of porous pavement) are not to be considered impervious surface if designed to function as a BMP per review by the Borough Engineer. Additionally, for the purposes of determining compliance with this Ordinance, the total horizontal projection area of all ground-mounted and free-standing solar collectors, including solar photovoltaic cells, panels, and arrays, shall be considered pervious so long as the designs note that natural vegetative cover will be preserved and/or restored underneath the solar photovoltaic cells, panels, and arrays, and the area disturbed is planned as a vegetated pervious surface.

\*\*Allowable impervious coverage per lot is subject to the regulations of the Borough Zoning Ordinance as amended.\*\*

The exemption and small project plan applications are not applicable for properties that are part of overall development plans that treated the stormwater runoff on a regional basis vs. on a lot by lot basis after April 7, 2014. Any additional impervious area located in these regional SWM areas would be required to process a full stormwater plan.

**Exemptions:**

1. Less than or equal to 1,000 SF impervious and less than 5,000 SF earth disturbance
2. Emergency exempt. – repair of existing facility (not including upgrades, additions or other improvements (106.C.1 (pg.11))
3. Maintenance – any maintenance to existing SWM system of facility (106.C.2 (pg.11))
4. Existing landscape (106.C.3 (pg. 11))
5. Gardening (106.C.4 (pg. 11))
6. Agricultural related activities (106.C.5 (pg. 11))
7. Forest Management (106.C.6 (pg. 12))
8. Maintenance of existing gravel and paved surfaces (i.e. resurfacing) (106.C.7 (pg.12)) \*Construction of new or additional impervious surfaces shall meet the ordinance.
9. Borough Roadway Shoulder improvements – shoulder improvements constructed within the existing roadway cross-section of the Borough owned roadways, unless NPDES permit (an acre of greater earth disturbance) (106.C.8 (pg. 12))
10. In-place replacement of residential dwelling unit – replacement in the exact footprint of existing one- or two-family dwelling units (106.C.9 (pg.11))
11. In-place replacement, repair or maintenance of residential impervious areas – the replacement of existing residential patios, decks, driveways, pools, garages and/or sidewalks that are accessory to an existing one- or two-family dwelling unit in the **exact** footprint of the existing impervious (106.C.10 (pg.12))
